

RAMY DANIEL CAMPUSANO VOLQUEZ

Full-Stack Developer | Computer Science, Oakwood University

Huntsville, AL • ramydcampusanov@hotmail.com • Portfolio • GitHub: Daniels-not • LinkedIn

PROFESSIONAL SUMMARY

Full-stack developer and Computer Science senior at Oakwood University who ships production web and mobile applications end to end — from React/TypeScript front ends to Node.js, Firebase, Supabase, and PocketBase backends. Currently leads a 12-member team building a university-wide student platform, mentors fellow CS students as a tutor, and publishes open-source developer tools used by other engineers. Fluent in English and Spanish.

EXPERIENCE

Computer Science Tutor

Jan. 2026 – Present

Oakwood University | Huntsville, AL

- Deliver one-on-one and small-group tutoring in front-end and back-end web development, data structures and algorithms, and C++ to undergraduate CS students, adapting explanations to each student's background and pace.
- Break down complex programming concepts — recursion, asynchronous JavaScript, object-oriented design — into clear, step-by-step walkthroughs built for lasting understanding rather than one-off answers.
- Model debugging methodology and problem-solving strategy so students leave equipped to troubleshoot independently in their own coursework and side projects.

Project Director

Oct. 2025 – Present

Computer Science Club at Oakwood University | Huntsville, AL

- Lead a 12-member cross-functional team across development, design, and data using Git and GitHub, reaching 1,054 unique users and 3,426 page views within 5 days of launch.
- Plan sprints and maintain the product roadmap, and review code to set contribution standards across the team.
- Recruit and onboard new team members, and make key architecture and tech-stack decisions guiding the project's technical direction.
- Present progress and roadmap updates to club leadership.

Software Engineer Intern

May 2025 – Jul. 2025

Computer Science Club at Oakwood University | Huntsville, AL

- Built and shipped a full-stack web app using HTML, CSS, JavaScript, React, TypeScript, and Tailwind CSS to help students discover events and navigate campus.
- Built additional features beyond the initial launch, collaborating with designers on UI and integrating backend APIs to support them.
- Set up deployment and hosting, and wrote tests and fixed bugs to improve reliability ahead of launch.

Help Desk Support Specialist

Aug. 2024 – Jan. 2026

Oakwood University | Huntsville, AL

- Provided first-line technical support across hardware, software, and account issues for students and staff university-wide, diagnosing and resolving problems under time pressure.
- Administered user accounts and system access controls, helping keep university systems running with minimal downtime.
- Logged and tracked support requests to closure, maintaining accurate service records that improved continuity across shifts and staff.

Full Stack Developer

Sep. 2022 – Dec. 2022

Mercury Soluciones | Remote

- Built and maintained Windows services and WebForms applications using VB and ASP.NET for business-critical internal tooling.
- Developed integration interfaces connecting third-party systems and authored the technical documentation other engineers relied on to maintain and extend them.

Full Stack Engineer

Apr. 2022 – Dec. 2022

LogicOne | Remote

- Designed and built responsive web applications using React, ASP.NET MVC, and Node.js.
 - Implemented front-end and back-end features together — from UI components to the data flow behind them — to deliver a seamless end-to-end user experience.
 - Collaborated on application architecture and framework selection with an eye toward scalability and long-term maintainability.
-

SELECTED PROJECTS

Campus Companion — OU Computer Science Club

2026

- Co-developing the CS Club's next flagship platform, the successor to Campus Connect, building new features as part of a multi-contributor team.

- Maintain a branch-per-developer Git workflow that keeps main stable while multiple engineers ship in parallel.

usemoor — Open-Source React Hook Library

2026

- Published an open-source npm package of React hooks for offline-first, optimistic state management with background sync, for use in other developers' projects.
- Built and shipped the full marketing and documentation site for the package, from copy to deployment.

OakEats — Smart Cafeteria PWA

2026

- Built a progressive web app (React, TypeScript, Vite, Supabase) featuring live crowd voting, calorie tracking with exportable charts, allergen detection, and a role-based staff portal.
- Demoed the finished product to university leadership as a working prototype for improving the campus dining experience.

ResumeAI — AI Resume Builder

2026

- Built a free AI-powered resume builder (Next.js, TypeScript, Tailwind, Gemini 2.5 Flash) after struggling to find a good free tool himself.
- Designed a 9-step guided form with 5 templates and multi-page PDF export via jsPDF/html2canvas; deployed on Vercel.

Untangle — AI-Generated Visual Advice Tool

2026

- Reimagined a college-advice chatbot as a visual experience, having Claude choose the right visual format — timeline, decision tree, comparison, or for/against scale — per question asked.
- Built an animated, explorable interface that renders these visuals live, making school, major, and career decisions easier to reason through than a plain text answer.

Anchor — Campus Wellness PWA

2025

- Built a React, TypeScript, and Framer Motion app with mood logging, an animated wellness insights dashboard, and lightweight messaging.

EDUCATION

Bachelor of Science, Computer Science

Jan. 2023 – Jul. 2027

Oakwood University, Huntsville, AL | GPA: 3.9/4.0

Software Technologist

May 2027

ITLA, Santo Domingo, Dominican Republic | GPA: 9.0/10.0

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, SQL

Front-End: React.js, Next.js, HTML, CSS, Tailwind CSS, Framer Motion

Back-End: Node.js, Express, ASP.NET, Firebase, Supabase, PocketBase, Microsoft SQL Server

Tools & Platforms: Git, GitHub, Vercel, Figma, Mapbox GL JS, WordPress, Elementor, Visual Studio

Additional: REST APIs, Data Analysis, NumPy, Agile/Scrum, PDF Generation (jsPDF/html2canvas)

SOFT SKILLS

Team Leadership, Cross-Functional Collaboration, Mentoring & Coaching, Technical Communication, Problem Solving, Project Ownership, Adaptability, Bilingual Communication (English/Spanish)

CERTIFICATIONS

SCRUM Foundations (Certiprof), T-SQL (Udemy), React.js – Webpack & Babel (Udemy), TypeScript Comprehensive (Udemy), Node.js – Express & MongoDB (Udemy), Git from Basics to Advanced (Udemy)

VOLUNTEER EXPERIENCE

Cameraman

Jan. 2025 – Present

Oakwood University Church | Huntsville, AL

- Manage technical streaming operations for weekly live services, delivering a reliable digital experience for remote viewers.
- Maintain soundboards, cables, and microphones, and provide real-time audio support during live services under no-second-take conditions.

Web Developer & Audio Engineer

Nov. 2023 – Feb. 2025

OLA Church | Remote

- Designed and maintained a responsive church website (WordPress, Elementor, Figma), independently managing content updates, domain, and hosting.
- Ran mixing and soundboard operations for live services, rehearsals, and digital streams.

LANGUAGES & INTERESTS

Languages: English (Fluent), Spanish (Fluent)

Interests: Weightlifting, International Travel, Building Computers, Anime
